Millpond appoints new Technical Director

Millpond announces today that **Christopher Ostenfeld**, age 43, is promoted Technical Director taking on the responsibility for all technical subject matters related to the company's manufacturing of custom optics like free-form mirrors, molding tools and prototype polymer lenses.

Christopher holds a Ph.D. in Physics from Technical Univ. Denmark and has been with Millpond for the last 6 years. Prior to this he worked for 10 years at Danfysik within Magnetics instrumentation for international research clients like e.g. CERN.

"Over the past Christopher has demonstrated superior technical skills and ability to help Millpond grow its Free-form optics business and he is the natural successor to Henrik Madsen, who will continue as member of the Board" says Jens E. Schrøder, Managing Director.
